CANADIAN LEGION VOTES FAVOR OF BUILDING CLUB-- WILL RAISE PART COST BY SALE OF BONDS

Ultimate Objective is to Erect 2-Storey Modern Building to Accommodate Legion and the Women's Auxiliary--Members Enthusiastic in Support.

The regular meeting of the Canadian Legion held last Friday received the report of the building committee, submitted by H. T. Halliwell. The report stated that after careful consideration of the committee, consisting of W. Purvis, J. L. Lonsbury and H. T. Halliwell, it was estimated that a sum of \$10,000 would be required to erect a suitable building so constructed that it could be added to later.

To raise the funds required, it was proposed that every Legion member and others interested in the erection of a club purchase a bond for \$25, and though no definite time could be stated for the repayment of same, it would be the intention that after the principal cost of the building had been met, the bonds would be repaid out of revenue.

A motion was put to the meeting, whereby it was decided to appoint a committee to canvas all Legion members and those qualified to become members, besides a number of business men who might become associate members under the terms of the constitution of the Canadian Legion.

It was proposed to raise at least \$2,000, so that in addition to the sum realized from the carnival, the branch would have over \$2500 as an initial payment on the total cost. For the balance, a loan would have to be negotiated.

In regard to securing a site, W. S. Purvis was authorized to interview owners of some properties and report at the next general meeting.

A smoker will be held on Saturday, October 3, and a dance on Armistice night, for which committees were appointed.

Buy From Journal Advertisers

BUY from the advertisers whose announcements you see in The Journal. It is by their help that this paper is published each week. They are doing their share in community building by putting back into it a share of their profits. They are the leaders in their respective lines of business; they have the true community spirit, not taking all and giving back nothing to the place in which they live and do business.

You can depend on dependable merchandise when you buy from Journal advertisers. And The Journal does its part in keeping Coleman on the map.

What Might Happen In Alberta

Full Press Control Claimed by German Leaders in Futherance of Nazi Policies.

Recently, the newspaper publishers of Alberta were called in congress in Edmonton, and informed that every single publisher must consider it to be his supreme duty to the people and the State to live and act for the furtherance of Social Credit.

Most people who read this will be surprised. Actually this has not happened in Alberta, but it has in Germany, for newspaper and magazine editors are assembled in the chief cities and towns from time to time to be instructed afresh concerning their duties. The first paragraph is from a news despatch from Berlin specially despatched to the Christian Science Monitor, a newspaper noted for its accuracy. The only change made in it by ourselves is that Edmonton and Alberta have been substituted for Hamburg.

The despatch states in part, National Socialist leaders have attained what has from the outset been their aim—complete control of the press.

Expense Bar To Senior League

Canadians May Have to Remain in Crow League for 1936-37 Season

A six-team senior league comprising teams from Edmonton, Calgary, Drumheller and Olds will probably be formed in Alberta this year. Preliminary arrangements were made at a meeting in Calgary recently and final arrangements are expected to be made within a few weeks. Coleman was expected to seek entrance into this league, but with Edmonton entering this year and the travelling expense involved it is doubtful what action the local executive will take.

Coleman have been negotiating towards gaining entrance into the Kootenay league but, states President Creegan, no

The Ladies Were Canny

Leaving the bank, we saw a delegation of ladies approaching. Being always on the lookout for news, we were inquisitive to know their mission. One of the ladies volunteered the information they were going to put some money in the bank. Asked if they had much, they drew the line at giving any further information, so a budding news story was nipped in the bud right there.

Speed Train Arouses Keen Interest

Will Be in Daily Service Between Calgary and Edmonton. 1500 Pass Through Train Here.

The semi-stream-lined C.P.R. train aroused widespread interest and most of Coleman's more than 3,000 population were at the station on Saturday afternoon, when they walked through the coaches, tickled the upholstery, admired the lighting system and the many other improvements in this finely equipped train. Curiosity of the small boys, and many of the older, centred on the handsome locomotive, the most radical departure from the ordinary equipment, which, with the tender, weighs 231 tons. Its streamlines aroused admiration, and its size was also impressive. Small boys who had expected to see a silver streaked stream-lined train were disappointed.

The train is to be placed in regular service between Calgary and Edmonton, and will undoubtedly prove a very popular feature especially in competition with bus travel. Being air-conditioned and dust proof, it will offer many advantages in rail travel.

Passengers on the train were Mayor D. H. Elton of Lethbridge, Senator W. A. Buchanan of the Lethbridge Herald, Ex-Mayor Barrowman of Lethbridge, and Mrs. J. B. Wilson of Blainmore. Coleman passengers were Mr. George Kellock and Col. R. F. Barnes.

Merchants Report Slow Settlements

Suggestion of Small Debts Courts Made to Impress Slow-Pays With Necessity of Attending to Obligations.

Common complaint is made by retailers of the slowness with which debts for goods supplied are being met. Though work has been on the whole steadier during the past two years than for some years previously, retailers state they find it has not resulted in increased payment of credit accounts, and that between paydays there is very little money in circulation.

In some cases debts are being treated with indifference, yet payments are being made on installment purchases. Merchants state the only effective remedy for improving the condition complained of is by combined action through the local branch of the Retail Merchants Association, and the eliminating of credit to those who are poor risks and slow pays.

headway has been made.

It appears that Coleman will again have to play in the Crow league, and get a number of strong teams to come in for exhibition games.

Lena Snider is Coleman's Outstanding Athlete in Inter-Scholastic Track and Field Meet, Winning 4 Class A Events

Lena Snider, Coleman school girl, covered herself in a blaze of glory at the inter-scholastic track meet at Blairmore yesterday when she won four events to win Class A division and the bronze medal emblematic of that championship. Lena only entered four events and proved to be one of the outstanding stars at the meet.

Jimmy Slugg, local boy, gained first honors in the boys A division with two firsts, second and third. Run-up was his team mate, N. Polski, with two firsts. Bob Emmerson, competing in the senior class, was well to the fore, winning three firsts and four thirds to win the championship of his division.

Lack of sufficient entries in the various events proved Coleman's downfall, the other schools gaining many points in events which Coleman failed to enter.

A shield goes to the school winning the most points in the senior events and a second shield goes to the school winning the highest number of points in the junior events.

Miss Elsa Jensen of the White Birch Cafe left on Monday for a short vacation at Medicine Hat. Mrs. Russell Ferguson has returned after several months visit in eastern Canada.

Official Returns Show Substantial Increase Since 1931 Census

Incorporated Area Shows 426 Increase—Increases Also in Cardinale, East Coleman and Grafton town

Following the 1931 census Coleman's population was over 2700. The census taken in June shows an increase in the incorporated area of 426, approximately 25% over 1931, while a corresponding increase will be shown in the sub-divisions, which will give an approximate population of 4000.

This is a nice addition to the population, and should help all lines of retail business. One weekly newspaper on our exchange list editorially remarked that in many instances it was noticed that in towns with good local newspapers, population increases were shown in the latest census. The prime reason of increase here is the development of the coal industry, but The Journal nevertheless is pleased to note such an increase, and will continue to do its part to make Coleman a worthwhile place in which to live.

Burns-Bowling Wedding

The wedding is announced of Mr. W. J. Burns and Mrs. A. G. Bowling in Edmonton on Sept. 1 at Robertson United Church. Many, by Rev. H. McLeod. They will reside at 10151-117 Street, Edmonton. Both are former residents of Coleman.

DIXIE
PLUG SMOKING TOBACCO

Requisites For Safe Driving

The summer just passed has produced the usual crop of automobile accidents to drivers and passengers in the three prairie provinces. The daily newspapers have duly recorded numerous accidents together with the names of killed and injured, and when the information was available, the causes of these frequent disasters.

It is yet too early to record figures detailing the number of accidents and the toll of dead and injured. These will be available later, but indications are that there will be little, if any, reduction below the 1935 record, despite the safety first campaigns which have been waged by governmental authorities, automobile clubs and commercial organizations interested in the subject, through the public press, over the air and through motion picture presentation.

It does not necessarily follow that such campaigns are a failure, but it seems to indicate that public memory is short lived or that the capacity of automobile drivers to avoid accident, no matter how well-intentioned or how careful they may be, is below par. The latter is probably a close approach to correct diagnosis of the ailment.

Statisticians and experts working on figures and available data on the causes of automobile accidents in the United States last year came to the conclusion that the number of accidents arising from defective equipment or faulty mechanism is comparatively insignificant, from which it follows that the human element, the capacity and capability of the driver, is in the majority of cases, the factor mainly responsible for disasters on the highways.

In other words, a large percentage of automobile accidents, can be reasonably attributed to lack of training or lack of experience on the part of the driver and perhaps in many cases, a combination of the two. This statement does not take into account accidents which can be charged up against recklessness, alcoholism or criminal negligence.

Undoubtedly lack of training and lack of experience are the causes of a number of crashes and the opinion is gaining ground that a substantial percentage of accidents is caused by drivers who are ordinarily careful but who have not had sufficient experience to sense danger in time to avoid it or who, sensing a pending risk, are not skillful enough to resort to the proper course to follow in time to prevent disaster.

In view of these conclusions there is much to be said for the adoption of courses of training for those who intend to operate powerful and speedy motive vehicles over the highways. This might be followed by examination of applicants for operators' licenses for the first time, though it would not be feasible to insist on making such tests the sine qua non for the right to drive for those who have previously been granted licenses. Courses of such a nature, if properly carried out by competent persons would at least partially, if not completely, take care of lack of training.

As for accidents caused by lack of experience, these can only be overcome by experience, supplemented by instruction. That drivers can and do develop a form of road sense which warns them of impending danger is the testimony of Oliver Stewart, writing in a recent issue of The Observer of London, England, where the mounting accident toll is causing grave concern.

The writer explains that in course of time a driver learns to interpret small signs which to a novice would pass unheeded. "A driver on a main road about to pass the entrance to a side road, suddenly slows down. No other vehicle is visible; yet as he reaches the side turning, a motor bicycle comes out of it and turns into the main road. If the driver is questioned as to the reason he slowed down before any other vehicle was visible, he will probably say: 'It's intuition!'"

To Mr. Stewart that is not altogether a satisfactory explanation. He pointed out that in all probability the driver unconsciously registered some small sign that something was coming down the side road, a pedestrian turning his head in that direction or a flock of sparrows taking to flight from the ground or some other indicator.

"The swift interpretation of such things," says Mr. Stewart, "is road sense and it is acquired with practice; but it is much too rarely taught. At first the signs will be seen, but not interpreted, and, in the absence of specific instruction, it is only with long practice that the interpretation can be expected to come without delay."

May Increase Duty

Britain Likely To Get Revenue From Foreign-Made Flags

Foreign-made flags, pictures of the King and other articles suitable for the coronation may be subjected to higher import duties.

Increases are being considered on articles for use in or commemorating the coronation, or as souvenirs, which have a representation of the King or any member of the royal family, any royal emblem, or bear a flag of any country in the British Empire, or are in any way suitable for the coronation.

Papa (to Johnny, four years old): "Won't you have another piece of duck, Johnny?"

Johnny: "Yes, please, father, I will, duck's my favorite chicken 'cept turkey."

Producing New Paper

Russian Scientists Claim It Will Last 1,000 Years

A new brand of paper—so strong that it will "last 1,000 years"—has been invented by scientists at the Leningrad laboratory of preservation and restoration of documents, it is claimed.

The formula for the paper was discovered as a result of studying Egyptian and other ancient kinds of paper.

According to the director of the laboratory, Professor Tikhonov, production of the new paper will cost no more than the manufacture of ordinary paper.

An improvement in the gear wheels of dial telephones now permits them to live through 5,000,000 operations instead of 100,000, formerly.

Houses Strange Collection

Many Interesting Curios To Be Seen In Private Museum

Charles Q. Eldredge, veteran world traveller, who has celebrated his 91st birthday, is the sole owner and curator of the Eldredge free museum at Old Mystic, Connecticut, which boasts of more than 7,000 items collected in the last 81 years.

Early in life Eldredge developed a mania for collecting things, and in 1817 he erected a separate building for his trophies and opened his free museum. Since that time, more than 60,000 persons have viewed the collection, while Eldredge himself has personally conducted 25,612 persons through the building.

The collector is as fond of entertaining, as he is of collecting curios. He displayed his love of entertaining friends in 1891 when he returned to Old Mystic after engaging in the building business for 20 years, and built a large recreation centre which he called Riverview. Hundreds of guests from Connecticut and neighboring states have used his bowling alleys, shooting galleries and other amusements.

The museum houses as strange a collection as has ever been assembled. In front of it rests the bleached skeleton of a whale, 90 feet long, the gift of Capt. John C. Spicer of Groton, Conn., who caught it in Hudson Bay in 1879.

An enormous penguin greets the visitor just inside the door. It came from Cape Horn and the card around its neck is typical of the labels Mr. Eldredge has placed on the exhibits. The card reads: "I am sure that you folks, like me, are close readers of the Bible, as you will remember that somewhere it tells about those who have ears and hear not and eyes and see not. Well, here is a bird which has wings and flies not."

Eldredge takes more pride in his souvenirs than in his natural history collection. He has what he believes is the first cannon ball fired against Fort Sumter, and he says that Edmund Ruffin, the fellow who fired that shot, also fired the last shot of the civil war. Here he heard that Lee surrendered and he shot himself through the head.

Some of his other prize items are a petrified cocoon, which, he says, dates from 437 A.D. and was found during a digging of the Panama canal; a ship model built in a bottle and which won the world prize for that sort of thing in 1934; a petrified oyster weighing eight and one-half pounds which was found in South Africa in 1965; a piece of wood from the Confederate gunboat Merrimack, whose wooden hinges used on a barn door for more than 200 years; an almost complete set of all commemorative coins issued by states or the federal government, and several thousand rare postage stamps.

For Brighter Silver

Potato Water Is Said To Give It Extra Sparkle

Few people know that if silver is polished while it is hot the brightness is halved and the resulting brightness doubled! It is worth while to plan your washing up with this end in view. Leave the silver forks, spoons, teapot and cream jug to the last, pour a little fresh hot water into the basin and wash up the silver, drying it before it has a chance to cool down. Another queer and little known tip for silver is this: To give a.c. extra sparkle for a special dinner party, soak it for a moment in the water that the potatoes were boiled in. Dry it while still hot and the result will be amazing.

SELECTED RECIPES

DATE MUFFINS

¾ cup shortening
1 egg
2 cups flour
3 teaspoons Magic Baking Powder
¼ teaspoon salt
¼ cup milk
1 cup dates, pitted and chopped.
Cream shortening, add beaten egg, flour in which baking powder and salt have been sifted, and milk. Add dates. Bake about 25 minutes in greased gem pans in moderate oven at 400 degrees F.
For sweet muffins sift ¼ cup sugar with dry ingredients.

Teacher—"Johnny, you must bring a written excuse for being absent yesterday, from the head of your family."

Johnny—"She's away on a fortnight's holiday, ma'am; shall I bring one from me father?"

Pupils in Scotland have to get through about three times as many books, in the school year, as do London school children.

Great Britain is standardizing all brass foundry products.

Women In Banking

Few, If Any, Hold Positions Of Responsibility In Canada

Very few, if any, Canadian women, hold positions of responsibility with the banks. It is a field in which thus far the mere male has been able to stave off the feminine onslaught into the business world.

But in the United States, the number of lady bankers is sufficiently great to warrant an association of their own—the Association of Bank Women. This group will convene about the middle of October, just before the convention of the American Bankers' Association.

Officers held by members of the fair sex included in the association's roster run the entire gamut of the banking profession from president down. Included are presidents, vice-presidents, cashiers, trust officers, statisticians, directors, branch managers, and managers of departments such as exchange, collection, publicity, savings.

Sees Better Times

Secretary Of League Of Nations Paints Optimistic Picture

The turning-point in a world industrial depression has been passed, an official League of Nations report declared.

The report, prepared by the secretary, Joseph A. C. Avenol, presents an optimistic picture and says despite political clouds the task of solving outstanding international economic problems has become easier, and the solution would help to dissipate political apprehension.

Avenol in the report attributed the failure of agriculture to share fully in the general improvement, to the protection of agriculture in the industrial countries.

Officials said the league's economic committee favors discussion among the powers as soon as political conditions permit.

Taking More Medicine

The growing consumption of medicine in England is worrisome to Kingiey Wood, minister of health. "We are rapidly becoming a nation of medicine drinkers," he said in a speech to the House of Commons. The cost of medicine per head in England, he said, is double that in Scotland.

Market For Feeder Cattle

Seen In Old Country By Ontario Agricultural Minister

A good brisk market for Canadian feeder cattle was unearthed by Hon. Duncan Marshall during his recent stay in England and Scotland.

The Ontario Agricultural Minister predicted that this demand will continue this fall. William Henderson, one of the "Old Country" cattle feeders, held the same opinion, the Minister said. The British Government bonus on beef is one of the props of this "feeder" market. Canadian cattle can qualify for the bonus after a three-month stay on British pastures.

Mr. Marshall said Canadian horses were also selling at good prices and very quickly in the Old Country.

"There is a market right now for," he said, "Scotland has not got enough horses to do its work."

One Of Royal Pets

Favorite Pony Of Late King George Returns To Sandringham

"Jock", the favorite pony of King George, has returned to Sandringham. He has become a personal charge in the Royal list of pets maintained out of the King's Privy Purse. With the closing of the Castle mess at Windsor, Jock's return to his old home is thought the most convenient way of keeping him in comfort. Mr. French, the groom who has looked after the pony for nearly 20 years, is also to return to Sandringham. King Edward has placed a pretty cottage at his disposal, and he will enjoy the life of a Royal pensioner with nothing to do but to look after the pony and ruminate on his 30 years' Royal service.

Campaign Urgently Needed

To Show Europe Necessity Of Importing Hard Canadian Wheat

A campaign to fully convince Continental countries of the necessity of importing hard Canadian wheat to blend with their own was urgently needed today, Lieut.-Col. H. Barra, Canadian Trade Commissioner to France, stated at Winnipeg.

It was unlikely, he said, the French market would be lost to Canada, because French wheat must be blended with hard Canadian wheat to make good bread.

"Canadian wheat has achieved an enviable reputation with French millers during the past year, and they would not now abandon Canada in favor of Russia," the commissioner believed. "Much of the market Canada has lost in Europe might be recovered through an educational campaign."

Most of the best Canadian wheat originated in Russia, A. Espinov, chief of the State Plant Breeding Fund of the Soviet Commissariat of Agriculture, declared. He is touring Canada to discover whether descendant hybrids are suitable for Russia. Chief objective of the Soviet for the present, he said, was to supply her huge domestic market.

Although French is spoken by only 45,000,000 French men and women, it is understood and spoken by at least 175,000,000 other persons who are not French.

The groundhog and the woodchuck are the same animal, the former name being given to the animal in the eastern states.

Last year more people visited Canada than lived here.

EQUAL TO THE BEST
ELECTRIC SET
reception

IMAGINE AN "A" BATTERY which didn't have to be re-charged and which didn't lose its power gradually but maintained its peak to the very end.

And imagine that this battery gave perfect service not for just two or three months but for 1000 playing hours.

Wouldn't you jump at the chance of having such a marvel in your own set?

The opportunity is yours! Your dealer has just such a battery. It's called Eveready Air Cell and does everything the ideal "A" battery should do. It actually maintains itself by simply breathing air—and its power scarcely fluctuates for 1000 playing hours.

Hope Was Abandoned When Flyers Rescued In The Far North

Fort Reliance, N.W.T.—Hope had been abandoned by two Royal Canadian Air Force pilots lost for 30 days in the northern wilderness when rescue came.

Flight-Lieut. Sheldon Coleman and Aircraftman Joseph Fortey are recuperating in this outpost 900 miles north of Edmonton while sub-Arctic storms continue to delay their journey south. Flyers said their food was gone and they were calmly awaiting death when Pilot Berry sighted them from a rescue plane last week.

With Fortey nodding assent, Coleman told of the experiences they endured—three weeks on reduced rations, one week without food except berries and a couple of ground squirrels they snared. The fear of early freezeup and a storm that might bring death was described by Coleman as "discouraging."

Squadron Leader L. F. Stevenson, officer commanding the search, said their rescue was due to excellent teamwork of all fliers participating in the hunt despite bad flying conditions. The two lost airmen were found by Pilot Matt Berry, of Canadian Airways, Ltd.

Coleman and Fortey became lost August 17. "After two hours I believed, owing to a north wind that takeoff, that I was south of my track so I headed west in hopes of picking up Great Slave lake," Coleman said. "At the end of three hours, I realized I was lost."

"An hour's fuel remained and a south course was decided upon in view of the possibility of running into timber. I decided to land."

"Fortunately there was sufficient timber nearby and with the aid of two struts from the aircraft, tent poles were made. The next day emergency rations were opened and checked and rationed out to last for three weeks."

"During the stay all attempts at fishing by trolling and net proved unsuccessful. Three small ground squirrels were snared, but these were not plentiful and did not yield a great deal of meat."

"The emergency rations, while scanty, lasted 22 days, after which we caught two ground squirrels. We were actually only one week without any food. A few berries were found but these were scarce."

"As time wore on wood was being procured with increasing difficulty and it was necessary to stay in bed to keep warm, only lighting up in the evening to warm the tent before going to sleep."

Quota Almost Reached

Washington.—The U.S. customs commissioner announced nearly 93 per cent. of the quota of heavy cattle permitted to be imported by the United States under the Canadian trade agreement already had been exhausted. The report covered the period from January 1 to September 6. The quota of light cattle and calves was exhausted nearly two months ago.

United States Senate Munitions Committee Makes Investigation

Washington.—Details of what was characterized as "a most amazing contract" between the Dupont Company and an agent described as an international spy for the sale of munitions to Germany were dug out from one of the voluminous reports of the United States senate munitions committee.

The report said the contract, signed February 1, 1933, was destroyed the next day when "the very questionable nature of some of its provisions were realized," but later the reputed spy was paid \$25,000 by the United States munitions firm.

The committee disclosed the contract in reviewing the evidence it collected on the re-arming of Germany in violation of the Versailles treaty. American munition firms were said to have known of the treaty violation as early as 1934.

At Wilmington, officials of the Dupont Company refused comment, saying their answer would be found in the testimony of the hearings.

The report outlined what it described as "close relations" between E. I. Dupont de Nemours and Company, largest powder manufacturer

French Ship Wrecked

Only One Survivor When Vessel Founders Off Coast Of Iceland

Reykjavik, Iceland.—Captain Jean Charcot, noted French explorer, was drowned, together with all but one of the crew of 60 aboard the exploration ship Porpoise Pas, which foundered in a gale off Iceland.

(Some reports reaching London said only 40 persons were aboard the vessel.) The lone survivor reported was Petty Officer Eugene Geonic, who swam ashore through heavy surf and foundered, exhausted, into the home of a fisherman.

Geonic gasped out that the vessel grounded on rocks and was pounded to pieces by heavy seas so quickly those on board had practically no chance to escape. He said he was certain none of the 60 members of the crew save himself had survived.

The bodies of 30 men, including that of Dr. Charcot, were washed up on the beach Icelandic coast.

The Danish gunboat Agor, which first reported the disaster, searched the seas about the sunken vessel's protruding spars but found no other survivors.

The vessel struck so quickly no distress signals were deployed before she went to the bottom.

Dr. Charcot, 69, had an international reputation as an explorer. The region on the edge of the Antarctic near Grahamland was named for him and is known as Charcot's bay. He led two expeditions to the south polar areas—in 1905-1908 and in 1908-1910—and held credentials from both the French and British governments.

The last expedition to the south polar area was made in the Porpoise Pas, which was built especially for the explorer in 1908.

Ex-Toronto Pilot Killed

British Air-Liner Taking Mail To Hamburg Struck Tree

London.—Captain Walter Fraser Anderson, formerly of Toronto, and two others were killed when an air-liner belonging to British Airways Limited struck a tree and crashed in flames after taking off from Gatwick aerodrome.

Captain Anderson, chief pilot for the line, was living in Toronto at the outbreak of the Great War and returned to England with the first Canadian division. His wife witnessed the crash.

The plane was flying mails to Hamburg and there were no passengers aboard. A fourth member of the crew escaped with injuries.

Report Is Denied

London.—The Ethiopian Legation issued a formal denial of reports that Emperor Haile Selassie has purchased an estate at Bath and intended to establish a permanent residence there.

Our Power Resources

Estimated Canada Could Supply 45,000,000 Horsepower

Ottawa.—Canada is the possessor of widely-distributed water power resources which it is estimated would supply a turbine installation of 45,000,000 horsepower. Hon. C. D. Howe, minister of transport told delegates to the world power conference here.

At present only about 8,000,000 horsepower is being produced, which is less than one-half of the United States and exceeds that of Italy by 2,000,000 horsepower, he said. On a per capita basis Canada has an installation of 722 horsepower per 1,000 population, comes second only to Norway.

Mr. Howe presided at a dinner given by the government of Canada to approximately 300 delegates representing more than 30 different countries of the world. The delegates came to Ottawa in the course of a "study tour" which followed the world power conference at Washington last week. At the conclusion of the dinner, the entire party entrained for Niagara Falls, where they are scheduled to stop over before going to the United States.

In a brief reference to the St. Lawrence power, Mr. Howe said in the purely Canadian section of the river above Montreal, potential hydraulic resources were estimated at 2,000,000 horsepower. In the international rapids sections of the river it would be possible to obtain an output of another 2,000,000 horsepower. This would be divided equally between Canada and the United States.

Plans For Ethiopia

Italy To Launch Modern Highway Building Program

Washington.—Reports to the United States department of commerce indicated that Italy plans to launch a broad, empire-building construction program in Ethiopia when the rainy season ends late this month.

Under plans outlined by Premier Mussolini, advances to the department said, construction of a 2,500-mile network of modern highways will be initial undertaking. About 1,000 technicians, 30,000 Italian laborers and 70,000 natives will be needed in the road program, the department was informed.

Looking toward establishment of 12-hour air service between Addis Ababa and Rome, a new flying field will be built six miles from the African capital.

Medico For Far North

Ottawa.—Dr. Thomas Melting, Coronation, Alta., has been appointed doctor at the government post at Chesterfield in the Northwest Territories. It was announced here.

He will relieve Dr. L. D. Livingston, who has been at Chesterfield since 1934 and is coming out for several months' furlough. Dr. Melting will be one of the last to go into the north this season, leaving Churchill, Man., in a few days in a mission boat.

Fortune For Charity

New York.—Mary Gardner Thompson, 91-year-old philanthropist, left \$13,027,737 of her estate of \$14,914,031 to six New York charities, the appraisal showed. Miss Thompson, who died last April 22, was a descendant of Lord Gardner, who in 1639 bought Gardiner's Island at the eastern end of Long Island from the Indians and obtained for it a royal grant.

ON C.N.R. BOARD

James Y. Murdoch, K.C., Toronto, who is a member of the new board of directors for the Canadian National Railways.

Import More Wheat

Report Says U.S. To Be On An Import Basis This Year

New York.—A Washington correspondent of the New York Herald-Tribune reports that department of commerce and bureau of agriculture estimates indicate the United States will import more wheat in 1935 than in any previous year in the country's history, and four times as much as was ever imported in a single year before 1934.

The correspondent says that while the nation will consume about 42,500,000 bushels of foreign wheat, it will export only about 500,000 bushels, he adds.

"This year will, therefore, bring to a sharp climax the United States movement from a wheat export to a wheat import basis, accomplished in the last three years. Simultaneously an unpublished estimate by one group of department of agriculture experts showed pretty clearly that without the A.A.A.'s crop reduction policy the movement might never have occurred."

Department of commerce figures are said to show wheat exports from Canada alone totalled 11,350,000 bushels from July 1 to Sept. 12.

Food Shortage In Madrid

Demand That Rationing System Be Instituted

Madrid.—Prospect of an acute food shortage in Madrid became the chief preoccupation of the government, as lengthening queues outside groceries and butcher shops threatened to become disorderly.

While the population of the city has been swelled by an influx of civilians and militiamen, the task of bringing in food has grown more difficult in the face of the insurgent advance. Newspapers joined in demanding a rationing system be instituted.

In recent days increasingly long lines of shoppers, mostly women, have formed early each morning in front of Madrid food stores, particularly those selling eggs. During the course of the day some of them got out of hand and quarrelled with the militiamen detailed to maintain order.

The newspapers agreed with government officials there was actually sufficient food obtainable, provided a proper distributing agency could be set afoot.

HITLER DEMANDS COLONIES

Here is Reich Leader Adolf Hitler as he appeared at the Nazi Party convention at Nuremberg, Germany, accompanied by members of his staff, to one of the most important Nazi meetings since the formation of the Party.

Acazar Fortress Held By Insurgents Destroyed By Blast

Toledo, Spain.—More than half the 1,700 men, women and children within the Alcazar fortress were believed to have been blown to bits or maimed by the explosion of two mines, each stamped with a ton of TNT.

The two mines were touched off simultaneously, giving the impression at first that only one mine had been exploded by the government leaders of the siege against the insurgent-held citadel.

Similar mines were set to be exploded at the wish of the government leaders who postponed further action to give occupants of the fortress another chance to evacuate the women and children within.

The terrific blast of the two mines set off tipped the whole southwest tower from its base, the massive stone blocks of the fortress plunging into heaps.

Great gaps were blasted in the west and south walls, which were the only ones standing after the explosion.

A 15-minute artillery bombardment pounded the wreckage of the citadel; then 1,500 picked government assault guards stormed the debris.

The defenders still alive swung their machine guns in deadly arcs against the government attackers who sought to drive them from their redoubts at bayonet point.

The defenders fell back stubbornly, making each pile of wreckage a converted "pill-box."

Their women and children were believed to have taken refuge in the dungeon-like cellars far underground which apparently had not been crushed by the explosion.

At the entrance to the tunnels leading to the cavern, the male defenders fought off the invaders in a bitter six-hour struggle.

The mines were set off after hours of intense bombardment from two government six-inch guns posted in a sloping hill near the famous citadel.

Most of the city's population had been evacuated to the countryside in the early morning hours. Great crowds gathered to watch ominous pillars of smoke rise from the powdered ruins.

With a rumble and a roar the southwest tower was rent asunder, great chunks of rock hurtled toward the air.

Tons of debris scattered on the roofs of houses nearby, pieces of their shattered roofs clattering into the street.

The government attackers swarmed up the steep slope in front of the fortress, their rifles blazing away at the insurgents who rushed from shelter to man machine gun nests.

The detonations of hand grenades roared through the cavernous wreckage down into the pits where women

and children huddled together in terror.

After the mines were set off, groups of government militiamen could be seen now crawling over the debris taking shelter behind great blocks of stone, then exchanging shots and hand grenades with the defenders.

It was apparent much more fighting would be necessary to drive the insurgents from the fortress.

As the fighting went on hour by hour spectators looked in vain for a white flag.

Conductor On C.N.R. Board

Appointment Of Brenton L. Daly Is Confirmed

Ottawa.—Appointment of Brenton L. Daly, Winnipeg, to the Canadian National Railways board of directors, and J. C. McRuer, K.C., Toronto, to the vacancy on the royal commission on penitentiaries, was announced by Justice Minister Ernest Lapointe, setting prime minister.

Mr. Daly, a conductor running out of Winnipeg and prominent in railway brotherhood circles, was the nominee of the committee of union chairman who met in Montreal following the invitation of the government to the Canadian National employees to select their own representative on the board of directors.

There will be seven men on the new board which takes over the Canadian National administration October 1, supplanting the present board of trustees. The other six were named last week.

Will Appeal Conviction

McMahon's Counsel Has Not Yet Decided On Grounds

London.—Counsel for George Andrew McMahon announced he would appeal the conviction which sent McMahon to jail for one year at hard labor for brandishing a revolver with intent "to terrorize" the king. McMahon "silenced" the weapon at the king during a military procession, July 16.

Grounds for the appeal had not been fully decided yet but it was said the protest will be made on grounds the judge misdirected the jury in summing up the charge against McMahon.

Make Good Showing

Edmonton.—Believed to be a record for British Empire colleges, 94 University of Alberta students were successful in British War Office promotion examinations, according to word received here from Ottawa. These examinations are open to all universities throughout the Empire.

Premier Leon Blum Delivers A Vigorous Defence of Democracy

Paris.—Premier Leon Blum delivered a vigorous defence of democratic forms of government as France's "answer" to the anti-democratic speeches of Chancellor Hitler at the Nuremberg convention.

"The world's democracies," the Socialist premier said, "during the last century showed at least as much stability" as dictatorships even when the dictator was "genius."

"France does not pretend to impose on other governments the principles of governing which it finds wisest and most just," he said. "France rejects entirely the idea of a war of propaganda or a war of reprisals."

"It wishes to live in peace with all nations of the world, whatever their domestic regime."

Defying the revolutionary principle of government, the Socialist premier said:

"Without the civil equality proclaimed by the French revolution, the authoritative states of Europe would not have at their heads men who come from the depths of the people and draw from this origin their merit and their pride."

(Hitler is the son of an obscure customs official; Premier Mussolini of Italy is the son of a blacksmith.)

His speech was broadcast in French. It was translated into English, German, Italian and Spanish and rebroadcast from stations nearest those countries.

France is divided by conflicting doctrines of political parties, he said, but in time of danger would be united "to defend her soil."

"There are in France doctrines and parties which clash. France sees that as a principle of force and not of weakness."

"But as France is unanimous in her wish for peace, so will she be unanimous tomorrow . . . if it is a question of preserving the security of the fatherland—even more so to defend her own soil."

Blum appealed for a halt of the European arms race and reaffirmed France's faith in the principles of the League of Nations.

"Peace, he declared, is 'indivisible,' and cannot be maintained solely by an armed bloc."

Turning to the Spanish civil war, in which his government has promised strict neutrality, the premier said:

"The causes of the war which weigh on the world are already too heavy for France to aggravate them by the design of doctrinal crusade, whether it be for the ideas it thinks just and good, or against the systems it believes false or bad."

"France shall stand unanimously against any pressure or any threats against the full independence of her conduct, full liberty of decisions, and choices."

"France wants to coerce no one."

THE COLEMAN JOURNAL

H. T. Halliwell, Proprietor.
Published Every Thursday at Coleman, Alberta. Membership in Canadian
Weekly Newspapers Association and Alberta Div. C.W.N.A.

THURSDAY, SEPTEMBER 24, 1936

NOTES AND COMMENTS

THE ALBERTA division of the Canadian Weekly Newspapers Association will meet in Calgary on October 9-10, when lively discussion will take place on Premier Aberhart's threat to muzzle the press and impose a dictatorship because nearly 100 per cent. of the publishers have not editorially supported his theories to "abolish poverty in the midst of plenty."

Weekly newspaper publishers are imbued with a high sense of duty to their respective communities, and have always been advocates of progressive policies on sane lines based on human experience. To club them into submission is the aim of the premier. His un-Christian like attitude will undoubtedly act as a boomerang when people realize they have been misguided.

His demagogic attitude has developed from the class room and the Calgary Prophetic Bible Institute, where docile people have absorbed his teachings to such an extent that they believe he can do no wrong. Swelled up with an exaggerated impression of his own importance, he believes he can impose his ideas on a free people and make them act and think as he dictates. A legislative member, addressing a meeting at which Mr. Aberhart was a speaker, even went so far as to state that even if they did overstep the law in trying to put their policies into effect, they were doing no harm. This is a very bad example for a legislator to set up as a guide of conduct for the people who are admonished to observe the laws. Another instance is the effort to over-ride the injunction granted by Justice Tweedie whereby Edmonton council was prevented from giving up its Federal cash relief grant for Prosperity certificates.

APPEALING to emotion and religious sentiment instead of by a logical process of reasoning, Mr. Aberhart has carried the masses along much as an evangelist will enthrall a gathering to the point where they will become hysterical and declare they are saved. Under the spell of oratory which acts on the mind similar to intoxication, large numbers are willing to believe anything they are promised, and the premier is a star performer in the art of beguiling the public.

SOCIAL CREDIT dividends can only be provided by taxing the people of Alberta. The premier has pointed out that for a start the dividends will be possibly \$5, as production was very low this year. This confirms the statement that only from production can dividends be paid, and that in the years of good production, the producers will have to contribute more than when production is low. A gigantic taxation scheme to take from those who have to give to those who have not is all that can be said of it, the truth of which will very soon become plain to those who believed that dividends could be produced from the end of a fountain pen.

A REGRETABLE phase of the political situation is the splitting of the people into two camps, with bitterness of feeling. Much has been said of getting after the "fifty big shots," entirely overlooking the fact that the so-called big shots will take care of themselves, no matter what Mr. Aberhart may do. It is the "small shots" who will suffer; those who have life insurance policies, annuities, savings certificates and other investments in Alberta. Thrift is being discouraged and sanctity of contracts disregarded. The morale of the people is being undermined by such preachings, despite alluring phrases of taking care of the common people.

THE PROPOSAL to erect a club has long been discussed in Coleman. Lack of initiative in devising a plan to finance it has, it is hoped, been overcome by the decision of the Legion to ask all ex-service men and others interested in the proposal to buy a bond of \$25 payable monthly over a year. The street corners have been the only club for many years, for men will gather in convenient spots just to talk. A well-organized club properly conducted would be an asset. Those who expect to enjoy its privileges should be willing to share in the initial cost.

SEVERAL years ago the little air field which the Board of Trade was instrumental in getting cleared was regarded by some with cynicism, who could not foresee that it would benefit Coleman particularly. But it was this early interest shown by a few enthusiasts which counted largely in the decision to establish a permanent field here under the Department of Civil Aviation. The laying out and levelling of a field with 4,000 feet runway has furnished local employment, and it will place Coleman on the trans-Canada air map.

IF every business man in Coleman would give a little thought each week on how he could improve his service to his customers, it would be a factor in developing goodwill. It is one of the vital essentials in carrying on business with people. Without their goodwill, no matter what induc-

Turning the Tables
A man in search of a quiet holiday set out in a small sailing boat, his only equipment consisting of provisions and a wireless set. He sailed serenely for several days, until at last he sighted one of those liners which resemble small towns rather than ships. The appearance of the little boat created excitement on board the liner, which slowed down. The captain was wondering whether it was a matter of going to the rescue when the holiday maker moved to his transmitter and tapped out the message, "Is there anything I can do for you?"—London Observer.

MERCHANTS! To enthrall others in your store or business you must be enthusiastic yourself. Advertising in The Journal will surely arouse interest of Coleman shoppers.

Local News

Alex. Easton is in Calgary for a few days.

Mrs. George Hope was in Calgary last week receiving medical attention for an injured eye.

Joe Spievak, Dick Shone and W. Jenkins left on Monday afternoon for a holiday in Vancouver, travelling by auto.

Mrs. A. Beveridge entertained a few lady friends at a whist party on Friday evening. Prize winners were Mrs. A. Anderson and Mrs. Robt. Morris.

Miss Norma Plante left Thursday morning for Victoria Jubilee hospital after spending a five weeks vacation at her home here.

Men have been at work in Flumerfelt park cutting down dried out trees, which will furnish considerable relief fuel for the winter months.

Monday, Oct. 12, has been proclaimed by the Dominion government to be observed as Thanksgiving Day. Armistice or Remembrance Day, Nov. 11, falls on Wednesday this year.

High wind on Sunday night and Monday cleared off most of the leaves from shade trees and poplars, giving them a bare wintry appearance. On Monday afternoon the temperature was almost 80 degrees.

Mr. and Mrs. W. L. Rippon, Ralph and Lorraine, spent last Friday in Calgary, where they met Mr. E. W. McLeod, brother-in-law of Mr. Rippon, who had been attending a convention in Regina. It was their first meeting in six years.

Miss Elizabeth Beveridge, recently arrived from Fifeshire, Scotland, and Mrs. Tom Beveridge, of Vancouver, are the guests of Mr. and Mrs. A. Beveridge. Miss Beveridge spent the week-end at Coalhurst where she was the guest of her brother, Andrew, and his wife.

Mr. and Mrs. George Kellock and Jim, accompanied by Mrs. J. Kinneer, motored to Calgary last week. Jim will reside in the city having enrolled at Mount Royal College and Mrs. Kinneer will holiday in Calgary for a week, being the guest of Mrs. A. Rankine, former Colemanite.

Mrs. W. McKeown of Salmon Arm, B. C., who previously lived in Northern British Columbia, was here for a week visiting her brother, Mr. Fred Beddington, and Mrs. Beddington. It was the first time they had met for over twenty years. She is also visiting a sister in Michel, Mrs. J. Davey.

QUALITY PRINTING

The Journal office reminds its customers that all kinds of commercial stationery and forms can be printed here. There is no better way in which you can add tone to your business than by having good stationery, printed by those experienced in the art. Craftsmen in the printing trade ensure you printing that will satisfy, that you do not have to make apolo-

gies for in its appearance; stationery you'll be proud to send anywhere. That's the only kind printed at The Journal office. Remember that men employed in the local printing trade are also customers of Coleman stores, and that there is reciprocity in business as in many other things.

If it is advertised in The Journal it must be O.K.

Masonic Meet At Pincher Creek Enjoyable Affair

Southern Alberta Lodges Given Warm Welcome by Masons of Pincher Creek on Tuesday

With that warm hospitality for which the foothills city of Pincher Creek is noted over its fifty years, Spitzie Lodge A.F. & A.M. was the host lodge to the annual meeting of District No. 8, comprising seven Free mason lodges in Southern Alberta, viz., Macleod, Pincher Creek, Hillcrest, Coleman, Cowley, Cardston and Blairmore.

The grand lodge of Alberta was represented by Dr. V. H. Macauley, L. D.S., D.D.S., grand master, and John Kemmis, grand lodge secretary, whose mother lodge is Pincher Creek. Many past grand masters were present, including from this district G. E. Cruickshank, of Hillcrest, and Mr. Patterson, of Macleod. Coleman was represented by Mayor Pattinson, who for several years has faithfully acted as district secretary; M. W. Cooke, secretary of Summit Lodge; Col. R. F. Barnes, past master; Walter Purvis, sitting master of Coleman lodge; H. T. Halliwell, Eric Bergquist and H. Wilton-Clark.

The afternoon was taken up with lodge reports and general business pertaining to the order, and the evening was featured by a splendid banquet for which the Eastern Star ladies catered. A noteworthy feature of the evening's entertainment was the exceptionally fine program of instrumental and vocal music by the pick of the musical talent of southern Alberta, whose services elicited tributes of praise and appreciation from all who enjoy hearing them.

Addresses at the evening banquet were given by Dr. Macauley, G. E. Cruickshank, Rev. Cannon Middleton, M. A. Murphy, Rev. W. Barlow and R. F. Barnes.

Contributing artists to the musical portion of the program were A. E. McMurdo; George Kerr, an outstanding young violin player of Blairmore; Donald Pearson, boy soprano of Pincher Creek; Miss Jean Ryan, of Pincher; Frank Hozek, violinist of Bellevue; C. W. Taysom, of Pincher and accompanists Miss Chardon, of Blairmore, and Mrs. Freebairn of Pincher.

Forest Fires Again Cause Alarm

The high wind on Monday caused forest fires in the North and the South Fork districts to again break out, and 35 men from Coleman were sent out south on Monday, and a number sent north. There was a strong smell of smoke in the air early Tuesday morning, while on Sunday night a reflection of fires could be seen from town.

The fires are the hang-overs from those of August, which not having been completely extinguished by rains, spring to life under the violent winds.

GUTTERSNIPE CONDUCT

A vicious feature of the Social Credit propaganda is that it stirs up hate between people who otherwise, despite political views, have been on good terms with each other. An instance of this is noted in that last week a copy of The Journal was returned to this office, without any name attached, but with indecent language characteristic of the gutter scrawled over it by a supposedly Social Credit supporter who took this way of expressing his dislike of articles published in the news columns. People with intellect will not hesitate to express their opinions in a decent way. To send in to a newspaper an unsigned misnomer of any kind containing obscene language is an offence against decency and fair play.

LOCAL AND GENERAL

Mr. and Mrs. James Atkinson were recent visitors to Coleman.

Miss Annie Korolyk is attending normal school at Edmonton this term.

Miss Olga Belovich left some time ago for Calgary, where she is taking a business course at Garbutt's Business College.

Miss Irene James, B.A., left on Tuesday for Edmonton to complete her studies at the University of Alberta.

Mr. and Mrs. T. Holstead are spending a week visiting at Spring Point, and will also spend a few days in Calgary visiting relatives.

Remember the date of the sale of work, wheel drive and dance of the Ladies' Auxiliary of the Canadian Legion, Saturday, December 5th.

Musical Festival Issues Annual Appeal

Benefits of Festival Emphasized as Basis of Appeal to All
Organizations, Business Men and General Public

September 26, 1936

Dear Sir:-

May we respectfully remind you that the Twelfth Annual Festival of the above Association will be held on Nov. 2-3-4, 1936.

The growth of this festival and the widespread interest it creates indicates to some extent its value, particularly to the young people, to whom it is an incentive to excel in musical studies, now a part of the curriculum in all Pass schools.

Our success in the past has in large measure been due, financially, to hearty support and co-operation of councils, school boards, and the various business interests of the district, who have contributed annually since the festival movement was inaugurated in 1925.

The executive committee again ask if you would continue your share of support to this worth-while community effort, and thereby help in its success. It is particularly requested that this letter be placed before the various municipal and civic organizations, town councils and school boards, by their respective secretaries, as we feel that the festival movement serves all classes and therefore is justified in making a general appeal.

In anticipation of your favorable consideration and contribution which will be acknowledged in our annual printed report, we are,

Yours very truly,

THE FINANCE COMMITTEE.

G. E. Cruickshank, Hillcrest

Operated By Remote Control

Driverless Car Observed All Rules Of The Road

Bliss New Yorkers gasped at a
vacant automobile which observed
all the rules of the road as it wove
through traffic on a busy Manhattan
street.

Patrolmen watchful for traffic
violations investigated to find that
the automobile was being operated
by remote control by the driver of
another car which preceded it.

They thumbed their traffic law
book in vain to find an ordinance
barring driverless cars and finally
took the automobile and Harold
Jonas to the police station.

Jonas explained that Charles A.
Harnett, motor vehicles commis-
sioner, had said he knew of no law
barring remote control operation and
had given permission for the experi-
ment.

The police sergeant made an entry
to this effect on the blotter and the
driverless car moved down the street.

Regular brewing establishments
first were brewed in 1700.

There are 8,430,800 cattle and
calves on the farms of Canada.

WORLD HAPPENINGS BRIEFLY TOLD

Maine elected a Republican gov-
ernor and three Republican congress-
men in the recent state election.

The Dominion government will pay
100 per cent. of the cost of direct
relief in drought-stricken southwestern
Manitoba. Premier Bracken an-
nounced.

C. W. Goyder, 28, who invented a
radio transmitter and held the first
two-way conversation between Eng-
land and New Zealand, has been ap-
pointed engineer-in-charge of All-
India radio.

Deal broker dealing with cases under
to the close of navigation of the
river, will be suspended from Oct. 1
to May 31, except for the post
offices of Cardross and White Horse.
The service will be suspended to
Champerne from Dec. 1 to March 31.
Grain experts in Ottawa agree
with a forecast from Chicago that
Canada's wheat surplus will be dis-
posed of by the end of the present
crop year, July 31, 1937. It would
not be necessary to sell as much as
last year to accomplish this.

Arthur E. Cavanagh, general man-
ager of the Timiskaming and North-
ern Ontario Railway, said that
amalgamation of ship, car and yard
facilities of the T. and N.O. and the
Canadian National Railways at
Cochrane is under consideration.

Calgary's application to the bond-
holders for reduction of interest
rates to possibly three per cent. in
order to save that city \$400,000 a
year is to be taken up with the In-
vestment Dealers' Association of
Canada.

The League of Nations Society in
Canada, announced appointment of
Miss Elizabeth P. MacCallum,
New York, as officer in charge of
the newly-established international
affairs information service to serve
its members and the general public
throughout Canada.

Former president of the Alberta
Municipal Districts' Association,
Frank H. Holmes, of Beaver Mines,
Alta., has been appointed to the ap-
Parcel post to the Yukon, owing
the federal creditors arrangement
act in the province, it was an-
nounced.

A Famous Fisherman

Zane Grey, Noted Novelist, Has
Broken Another Record

Zane Grey, novelist and big-game
fisherman, has broken another record
by landing with rod and line a giant
devil ray, off the Queensland coast,
which weighed more than 1,200
pounds.

It measured 12 feet across the
back and was 10 feet six inches long,
he reported. It is one of the few
giant rays ever caught with rod and
line, and was landed only after a
terrific struggle of nearly four hours.
The devil ray is a giant species of
the stingray or "stingaree", and has
been known to exceed 20 feet in
width and half a ton in weight.

Grey recently broke the world's
record by landing an enormous shark
with rod and line off the New South
Wales coast.

First Invitation Issued

King Of Greece Receives One To
Attend Coronation

King George II. of Greece received
what was believed to be the first in-
vitation to King Edward VIII's
coronation in London next May.

The invitation was extended by
Sydney P. Waterlow, the British
minister at Athens. It was framed to
include also the members of the
Greek cabinet.

Persons close to King George said
he would either attend in person or,
if circumstances prevented, would
send Prince Paul, his brother.

The Greek ruler has long been on
the friendliest terms with the British
royal family, whose guest he was at
the time he was recalled from exile
to return to the throne.

An Underground Home

English Millionaire Is Building A
Bomb-Proof Wonder House

The first bomb-proof underground
home in Britain is to be built for a
millionaire—beneath a lonely stretch
of beautiful meadowland in the heart
of Hertfordshire.

This new wonder house will be
specially air-conditioned and flooded
with artificial sunlight, and accord-
ing to experts, it will make a heat-
ther home than the ordinary above-
ground house because it will not be
subject to air-carried infections.

The Atacama desert, in Chile, is
the driest spot on earth.

Every 100 seconds a road crash
occurs in Great Britain.

BLINDING HEADACHES MADE HER HELPLESS

Forced To Lie Down For Hours
At A Time

Other sufferers from headaches will
be interested to read this letter—
"Until last summer I was subject
to very bad headaches. While they
lasted I seemed to lose my sight and
all power in my hands, and was
forced to lie down for hours at a
time. My aunt (who has taken Rus-
chen Salts for 12 years with bene-
ficial results) suggested my trying
them. I did so, and I've not had any
return of those headaches for months,
in fact I feel quite better. I shall
always take Ruschen regularly in
future."—(Mrs.) M.W.

Headaches can frequently be traced
to a disordered stomach, and to the
unsuspected retention in the system
of stagnating waste material which
poisons the blood. The numerous salts
in Ruschen assist in the complete
elimination of waste matter, result-
ing in a purer blood-stream, and
thus helping to bring relief from
headaches.

Plan Largest Liner

Sister Ship Of Queen Mary To Be
Fastest In World

The sister ship of the Queen Mary,
the keel of which will probably be
laid in November or December, is to
have a peak speed of 36 knots, ac-
cording to the London News-Chron-
icle. Leading draughtsmen of John
Brown and Company are now plot-
ting out the final theoretical design for
"552".

As soon as they are finished
models, built to the paper measure-
ments, will be tried out in the com-
pany's experimental tank.

The liner will be about 90,000 tons
and at least 12 feet longer than the
Queen Mary.

These stipulations will make her
without doubt the largest and fastest
liner in the world.

The best features of both the
Queen Mary and the Normandie will
be embodied in the new ship. For
economic running the Queen Mary
beats the Normandie. But the
French liner is said to be better
streamlined.

The geared turbine system of the
Queen Mary has satisfied the experts
that it is superior to others, and the
same type of engine will be adopted
in the sister ship.

Ceaseless tests by John Brown and
Company since the Queen Mary left
the Clyde have demonstrated that
the turbine system can be perfected
to save about 15 per cent. more in
running costs.

Arrangements have been made to
take on the extra men required for
building the ship.

As soon as the decision to lay the
keel is made, 2,000 men will be em-
ployed and by the end of next year,
when she is expected to be launched,
about 4,000 will be engaged on her
construction.

From then until the ship leaves the
Clyde in 1940 the number of men
employed will steadily increase until
at the peak of the fitting out in her
basin at least 12,000 will be working
on the ship.

Built Up Odd Profession

Man In London Is Greatest Living
Expert On Noise

There is a man in London who
lives on noise. Noise has become one
of the great problems of our age,
and this scientist and engineer was
quick to see the possibilities. He be-
came the greatest living expert on
noise. In fact he has built up out of
noise what might be regarded as one
of the oddest professions in exist-
ence—that of "Noise Consultant."

This man with the unique job is
Professor A. M. Low, well known as
a pioneer of wireless and an expert
on popular science, whose articles
have frequently appeared in print.
He has devoted 25 years to the
study of noise, ever since he lis-
tened to the noise made by a
motor-cycle engine.

Today you voyage in a modern
ocean-going liner and note the
absence of the multitudinous noises
common to many ships. Nine times
out of ten it is Professor Low's
knowledge which has eliminated
them. You buy a new car and com-
ment on its silence, its freedom from
body rattles and squeaks. Again it
may be Professor Low who has
solved the manufacturer's difficulties.
He is a modern Sherlock Holmes
tracking noise to its lair.

Britain's Colonial Empire

Speaking in Vancouver, Lord
Tweedsmuir made a noteworthy ob-
servation in reference to the view
expressed in some quarters that
Britain should share her colonies among
countries that lack colonies. "I
would protest most strongly," he
said, "against the notion that we
won our colonies by a lucky gamble.
We have been making our colonial
empire for 800 years."

SUNDAY SCHOOL LESSON

SEPTEMBER 27

THE SPREAD OF CHRISTIANITY
IN WESTERN ASIA

Golden text: They rehearsed all
things that God had done with them,
and that he had opened a door of
faith unto the Gentiles. Acts 14:27.
Devotional reading: Matthew 13:
24-35.

The genius of Paul. Why did Paul
and others of these early disciples
keep moving around after such a
restless fashion, preaching here for
a few days or weeks, and establish-
ing a little Christian group and then
moving on to another field of labor?
He did not settle down in one
place and stay at their task until
they had won the whole community
to the faith and built up a strong
and enduring church?

Dr. John Gardner shows how wise
was the genius of Paul. "He grasps
the problem of the world's mission in
brilliant fashion. He will follow the
great trade routes. He will build his
bases in cities and from them he will
reach the provinces. He will first
begin in the synagogues, for here
are the praying folk, believers in Je-
hovah; here are the sacred Scrip-
tures, and here a man may preach.
He will reach out through the con-
verted proselytes to the Gentile
world. He will unify the work, link-
ing up the new churches to the old,
teaching them to give to the neces-
sities of the poor in distant places.
He will return to consolidate the
work."

Many helpers in the work. We
must not forget that the Christian-
izing of Western Asia in the first
Christian century was not the work
alone of the apostles and their
especially chosen helpers, but that
a great company of men and women
co-operated with them. Great lead-
ers are needed in any worthwhile un-
dertaking, but followers and helpers
are needed quite as much and in
many ways vastly more. Good
preaching is essential. In the
Acts and Epistles we see how men
and women responded to the Chris-
tian communities. With all his zeal
and earnestness, Paul would have
failed in many instances had not
others stood by him loyally and
faithfully in times of testing.

New Surgical Operation

The possibility of a new surgical
operation involving the repair of the
heart is discussed in the annual re-
port of the Royal College of Sur-
geons. The operation is designed to
remedy certain conditions in which
the heart muscles are atrophic. It
involves a delicate "grafting" tech-
nique, the aim of which is to provide
an alternative path of circulation
through the heart.

Simple Crochet Makes Swagger Coat

Household
Arts
by
Alice
Brooks

PATTERN 5693

This waste-weave in a mixed yarn with plain collar, cuffs and pocket
trim in a stitch that looks like Persian lamb, is Fashion's newest note in
knitwear. The swagger coat—three-quarter length—is just the thing for Fall.
It will be appropriate for many occasions—it's even swaggar enough to
wear over a suit. If you prefer, you can use a plain yarn. In pattern 5693
you will find directions for making this coat in size 16-18 and 38-40; illus-
trations of it and of all stitches needed; material requirements.
To obtain this pattern send 20 cents in stamps or coin (coin preferred)
to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave.
E., Winnipeg.

There is no Alice Brooks pattern book published

VICKS VAPOR-NOL

New Lie Detector

Tests With New Device Prove Very
Satisfactory

A new lie detector much more ac-
curate than previous devices used in
crime detection was described before
the American Psychological Associa-
tion.

Dr. W. G. Summers, head of the
Fordham University department of
psychology, said how tests with the
"psychogalvanometer," on 50 groups
of college students had detected the
guilty with only two per cent. of
error.

Older lie detecting machines
known as "polygraphs" record on
paper the blood pressure and heart
beat of the person examined. Dr.
Summers' instrument instead mea-
sures extremely small electrical cur-
rent changes in the body.

Missing Landlord Found

Did Not Know Building Was His
Until Tenants Fought

George Ortelson, a real estate
dealer, was surprised to learn a six-
story building on Howe street, Chi-
cago, was included in a parcel of real
estate which came into his possession
through a mortgage transaction.

He might never have found it out
he mused, if two of the tenants had
not quarrelled and gone to court,
where incidental questioning revealed
nobody in the building had paid rent
for ten years because nobody knew
who owned it. An investigation dis-
closed Ortelson's unsuspected status
of landlord.

His attorney said rent would be
collected hereafter.

"Where is the manager's office?"

"Follow the passage until you
come to the sign reading 'No admis-
sance.' Go upstairs till you come to
the sign 'Keep out.' Follow the cor-
ridor till you see the sign 'Silence,'
then yell for him."

Paying Off Saddest Debts

British Pensions' Ministry Expects
To Finish Work In 1935

The British ministry of pensions
hopes to finish paying for its share
of the cost of the Great War by 1935
—41 years after its outbreak.

Last year the gross expenditure
of the ministry of pensions was £43,-
296,874—for war pensions and com-
pensation allowances to 1,006,000
people.

Since 1918 the ministry has spent
£1,135,000,000, and more than £180,-
000,000 of that sum has been used
for food, clothing, and education for
war orphans. In 1921, the peak year,
the ministry paid out £60,000,000 in
pensions.

At the end of the war there were
67 ministry-controlled hospitals for
disabled soldiers. Now there are 10
and a few clinics for out-patients.

"In a few years' time," an official
at the ministry said, "only £1,000,000
a year should be needed for pensions.
And it is estimated that the ministry
may finish its work by 1935."

One of the saddest facts in the
figures is that over 6,000 officers and
men are certified insane. More than
10,000 fighting men are undergoing
treatment in hospitals and are not
able to leave although there are still
hopes that they will be cured. In
1921, 17,380 hospital beds were used.
Today only 3,200 beds are needed in
hospitals controlled by the ministry.

Once there were 260,000 war wid-
ows receiving pensions. Today the
figure is reduced to 194,415, 120,000
of them having remarried.

Padewski In Movies

Beauty Of His Music To Be Heard
In New Motion Picture

Ignace Jan Padewski is having
the time of his life as a movie star
at 75 years of age.

Hundreds of movie extras are
thrilled daily by the aged master
pianist and statesman, recording with
enthusiastic delight the beauty of his
music in the motion picture "Moon-
light Sonata."

Playing with Charles Farrell, Pad-
ewski works daily from 3 p.m. to
6 p.m., playing again and again
the numbers he contributes to the
picture.

His contributions to the movie in-
clude the title number, Beethoven's
"Moonlight Sonata"—according to
tradition inspired by the sight of a
blind girl playing the piano as a full
moon cast its beams across the in-
strument, and works of Schubert
and Grieg.

Informality Of The West

Governor-General Is Addressed By
Mayor As Mr. Tweedsmuir

Informality of the west greeted
Baron Tweedsmuir, governor-general
of Canada, when he visited a south-
ern Alberta town, it was related at
Medicine Hat.

"It's not often we meet such not-
able people as Mister Tweedsmuir
here," said the mayor, dressed in his
everyday clothes and a sweater.
It was the first time the governor-
general had been addressed as "Mister"
since his arrival in Canada.

"I found the salutation distinctly
refreshing," said Baron Tweedsmuir.

For dining table use, aluminum
tongs have been invented with which
juice can be squeezed from pieces of
lemon without spraying a table or
staining a user's fingers.

Local News

Coleman soccer eleven will travel to Fernie on Sunday and play the Fernie club in the semi-final of the Graham cup.

Mr. William Bell and Miss Mae Bell were visitors to Calgary last week. They returned with a new Packard.

Mrs. Roy Thomas entertained in honor of Miss Gwen Rathburn on Thursday last. Miss Rathburn of Vancouver is spending two weeks vacation here.

Radio beam tests have been made during the week by Hollick-Kenyon of Lethbridge in his plane, and his machine was seen frequently last week circling over town. Two officials from the department of Civil Aviation at Ottawa are here in connection with the establishment of a radio beam signal station in connection with the intermediate air-drome west of town.

Bill Fraser Injured

William Fraser, locomotive driver at International mine, and well-known centre player on Canadians hockey team, was injured this morning about 10 o'clock when he was caught between his engine and some mine cars at the bottom of the slope on B. level. He was immediately taken to hospital for examination of his injuries.

Straight Talk To Foreign Born

Justice Tweedie in Calgary stated naturalization to foreign born residents of Alberta would not be granted by him till applicants had paid off relief charges. "We are not going to feed people from Europe when we have our own to feed," he stated.

Another matter which takes considerable money from Canada is that foreign born men employed in Alberta send considerable of their earnings back to Europe.

The Bees and the Drones

There are fortunately very few business men who do not realize they owe something to the community in which they do business. He who would take all and give nothing in return is just a leech on the community. It is the enterprising man, who gives of his time and energy towards civic and other enterprises, who is the real builder. Let's have more builders and fewer drones.

Which is Correct?

The statement by a Federal Social Credit member, Victor Quelch, to miners of Drumheller that if they do not accept 15% of their wages in Alberta Credit they will not be given a Social Credit dividend will be startling news to many mine workers here who signed the covenant. On Sunday, Mr. Manning in the Prophetic Bible institute broadcast, stated that the miners would not be compelled to take 15% in Alberta credit. There appears to be a lack of collaboration between Social Credit representatives.

Palace Theatre Notes

Programs booked for the Palace theatre this week include "The Bride Walks Out" featuring Barbara Stanwyck and Gene Raymond in the starring roles. Leslie Howard's own sensational stage success of last season, "The Petrified Forest" is billed for Tuesday and Wednesday and stars Leslie Howard and Bette Davis. "Personal Maid's Secret" will be shown as a second feature. A double program on Thursday and Friday will feature Gail Patrick in "Preview Murder Mystery" and John Howard in "Border Flight."

Misuda-Bozek Wedding

An interesting wedding was solemnized at the Holy Ghost church on Saturday when Annie Bozek, daughter of Mr. and Mrs. Martin Bozek of Coleman, was

united in marriage to Mike Misuda of Coleman.

The groom was assisted by Thomas Baker of Michel while Miss Annie Motil of Beaver Mines was bridesmaid. Father Dunbar officiated, Mrs. Maurer played the wedding music.

The bridal couple will reside in Coleman where Mr. Misuda is employed at International mine.

The Churches

The United Church

Services will be at the usual hours on Sunday. The course on "The Words of the Lord Jesus" continues at the morning gathering.

Attendance at Sunday school for last Sunday was within a point or two off seventy. There is room for all who should be present and teachers will be available for all classes. Parents are asked to encourage children under 16 years to attend.

St. Alban's Church

Trinity 16: The services will be as follows: 12:30 p.m. Sunday school. 7 p.m. Evensong and sermon.

SALVATION ARMY RALLY NEXT SUNDAY WITH ENVOY FRAYN

Next Sunday will be Rally Day and special services to which all adults, as well as children, are invited, will be held at 3 p.m., in addition to the regular services.

It is expected that Envoy Frayn, of Lethbridge, will be present. For 22 years he has carried on voluntary work in that city, making it his special care to hold services at the jail every Sunday.

The recent harvest services were well attended, and appreciation is expressed of the good work of Andy Thorburn in helping to decorate the interior of the hall, which excited admiration.

A special campaign will be held during the last week of October, when Salvationists from Fernie and Macleod will assist in the services.

In Memoriam

IN LOVING MEMORY of Ida Moir, beloved wife of Joseph D. Moir, who passed away on Sept. 28, 1929.

"Three little words, 'forget me not' Don't seem much, but mean a lot. Just a memory fond and true, To show, dear mother, we think of you."

—Ever remembered by her daughter, Mrs. H. T. Halliwell.

Tenders-School House Coleman School District No. 1216

SEALED TENDERS will be received by the Board of Trustees of the above school district at the office of the secretary-treasurer up to 4 p.m. Tuesday, October 6th, 1936 for the erection of a 6 roomed brick Vener school building after Plan No. SP 1108. Plans and specifications may be obtained from secretary-treasurer on payment of a deposit of \$25.00. Plans must be returned within 48 hours, and deposit will then be refunded. A marked cheque for 10 per cent of the amount of the tender must be enclosed with each tender as a guarantee that same is bona fide. No tender will be considered without this cheque attached. The lowest or any tender will not necessarily be accepted.

JAMES FORD,
Secretary-Treasurer.
Box 103, Coleman, Alberta.

A Court Whist drive will be held in the I.O.O.F. hall on Friday, Sept. 25, at 8 p.m. Lunch served. Admission 35c.

Sergeant-Major S. Yelland and Signaller M. M. Narraway, of the Corps of Signals, Ottawa, are located at Stephenson's place near the lake, where they are engaged in radio beacon work for the trans-Canada air route.

Miss Jean Pattinson spent Wednesday afternoon at the home of Mr. and Mrs. P. J. Burles of Cowley.

Mr. and Mrs. William Lees are spending their vacation at Vancouver.

The contract for digging the ditch for laying of waterpipes at Bellevue is now proceeding, after getting disputation over labor wages and the use of a digging machine straightened out. The work was held up for a while.
